CHANGE TO SALOMON'S IDEAL BODY MEASUREMENT FOR WOMEN.

In accordance with an extensive study by the French "IFTH - (Institute Francais de textile et habillement)" we have amended our IBM - (Ideal body measurement) for women.

This study is taken throughout France comprising a broad selection of the population, across both genders and all age groups, to present a very detailed study of the changing morphology of the human race. We have crossed referenced this study with our own internal research and have decided to amend the women's ideal body measurements as outlined below.

We have increased our waist measurement by +2cm & bust measurement by +2cm.

These measurement changes have been applied to the new and lifted products this season and will be a rolling change for the C/O products over future seasons.
